

Fall 2014 Grad School Workshop

When: 3-4:15pm, Mon Sep 15

Where: MacQuarrie Hall 320

Contact/RSVP: tim.hsu@sjsu.edu

Please email by **Fri Sep 12** to reserve a seat/free food

Want to do statistical consulting or help to cure cancer with mathematical models? Want to break or make codes or be a math professor? Then you should think about getting a Ph.D. in the mathematical sciences!

Our Fall 2014 Grad School Workshop is aimed at students starting graduate school in Fall 2015 or 2016 (though the sooner you start planning, the better). We will discuss what you need to do before, during and after grad school; how to prepare for and get into Ph.D. programs; what life is like in grad school; and what kind of job you can get afterwards.

We will also discuss personal aspects of grad school: how to pay for it (hint: a math Ph.D. should be **FREE**), what grad school means for your family, friends, and loved ones. All math majors and aspiring mathematicians are welcome. Come with questions, leave with answers.
