

Fall 2020 Grad School Workshop

When: 3:00-4:15pm, Wed Sep 02

Where: On Zoom

Contact/RSVP: tim.hsu@sjsu.edu

Please email so we can estimate expected attendance.

Want to do statistical consulting or study mathematical epidemiology?
Want to break or make codes or be a math professor? Then you should think about getting a master's degree or Ph.D. in the mathematical sciences!

Our Fall 2020 Grad School Workshop is aimed at students starting graduate school in Fall 2021 or 2022 (though the sooner you start planning, the better). We will discuss what you need to do before, during and after grad school; how to prepare for and get into graduate programs; what life is like in grad school; and what kind of jobs you can get afterwards.

We will also discuss personal aspects of grad school: how to pay for it (hint: a math/stats Ph.D. should be **FREE**), what grad school means for your family, friends, and loved ones. All math/stats majors and aspiring mathematicians/statisticians are welcome. Come with questions, leave with answers.
