

In your groups/teams, for each of the following batches of functions, you will:

- (5 min) Compute the derivatives of the given functions, one function per team member. (If there are only three people on your team, just do the first three.)
- (5 min) Hand your answer to the person to your left to check, and then discuss them as a group. When you're all happy all of the answers are correct, bring them up to be graded. No partial credit! **DO NOT SIMPLIFY YOUR FINAL ANSWERS.**
- (5 min) After each round, we'll discuss a few of the most interesting corrections teams made on their answers.
